

Q51. Your company is evaluating the use of Azure DevOps services. Can they make use of Git repositories in Azure DevOps for hosting code?

- **Yes**
- No

Q52. Your company is evaluating the use of Azure DevOps services. Can they host web applications on Azure DevOps?

- Yes
- **No**

Q53. Which of the following service can be used as an Apache Spark-based analytics service?

- Azure Data Factory
- Azure Storage Accounts
- Azure Functions
- **Azure Databricks**

Q54. Which of the following access tier is recommended for data that is accessed and modified frequently?

- **Hot**
- Cool
- Archive

Q55. Which of the following access tier is recommended for long-term backups?

- Hot
- Cool
- **Archive**

Q56. Which of the following service can be used to manage the deployment of containers?

- Azure Functions
- Azure Logic Apps
- **Azure Kubernetes**
- Azure Virtual Desktop

Q57. Which of the following service on Azure can be used for security information and event management?

- Azure Advisor
- Microsoft Defender for Cloud
- Azure Active Directory
- **Microsoft Sentinel**

Q58. Your company has just setup an Azure subscription and an Microsoft Entra ID tenant. They want to setup access permissions for the various users defined in Microsoft Entra ID. Can you assign the Contributor role to multiple users at the resource group level?

- **Yes**
- No

Q59. When using a Software-as-a-Service , are you responsible for applying all software updates to the underlying system?

- Yes
- **No**

Q60. When using Infrastructure-as-a-Service, are you responsible for installing the required software?

- **Yes**
- No

Q61. Your company is planning on using an Azure Storage account. They will be uploading objects using the Blob services. Does Azure storage accounts automatically replicate data to another data center?

- Yes
- **No**

Q62. Your company is planning on using an Azure Storage account. They will be uploading objects using the Blob services. Does Azure storage accounts automatically create three copies of your data?

- **Yes**
- No

Q63. Your company has a set of resources deployed within a resource group. If they delete the resource group, would it delete all of the resources within the resource group?

- **Yes**
- No

Q64. Your company has a set of resources deployed across several resource groups. Can a resource in one resource group access a resource in another resource group?

- **Yes**
- No

Q65. Which of the following service can give you cost recommendations on Azure?

- Azure Active Directory
- Azure Monitor
- **Azure Advisor**
- Azure Help + support

Q66. Which of the following would you use to purchase third-party software and deploy it to an Azure subscription?

- Microsoft Defender for Cloud
- Azure Advisor
- **Azure Marketplace**
- Azure Cloud Shell

Q67. Which of the following is used to take advantage of unused capacity when it comes Azure compute capacity?

- Azure Reserved Virtual Machine Instances
- **Azure Spot Virtual Machines**
- Azure Dedicated Hosts

Q68. Which of the following can be used to deploy complete environments in Azure which include Azure resources, resource groups and Azure policy assignments?

- Management groups
- Azure Policy
- **Azure Blueprints**
- Azure resource groups

Q69. You have an Azure virtual machine that is in the Stopped (deallocated) state. Would you still incur costs even if the virtual machine is not running?

- **Yes**
- No

Q70. Which of the following service collects signals from users during the sign-in process and then decides whether to allow or deny access to the user?

- Management Groups
- **Conditional Access**
- Azure AD Connect
- Resource groups

Q71. Which of the following explains the following

“Personal data Microsoft processes, how Microsoft processes it, and for what purposes.”

- **Microsoft Privacy statement**
- Microsoft Online Terms
- Azure Advisor

Q72. Which of the following are compute services on the Azure platform? Choose 2 answers from the options given below?

- Azure virtual network
- **Azure virtual machine**
- Azure container instance
- Azure Cosmos DB

Q73. You have configured an Azure virtual machine scale set. Can you automatically increase the number of machines in the scale set based on demand?

- **Yes**
- No

Q74. Which of the following service is used to store Blob objects?

-  Resource groups
-  App Services 4
-  Function App
-  SQL databases 2
-  Azure Cosmos DB 1
-  Virtual machines
-  Load balancers
-  Storage accounts 3
-  Virtual networks
-  Microsoft Entra ID
-  Monitor
-  Advisor
-  Microsoft Defender for Cloud
-  Cost Management + Billing
-  Help + support

- Azure Cosmos DB
- **Azure SQL databases**
- Azure Storage Accounts
- Azure App Services

Q75. Is it possible to use Azure Cost Management to view the cost of resources in your Azure account resource group wise?

- **Yes**
- No

Q76. You have an Azure Premium Storage account based on Block Blobs. Which of the following is not support when it comes to data redundancy for the blobs in the storage account?

- Locally-redundant storage
- Zone- redundant storage
- **Geo- redundant storage**

Q77. You are planning on using Microsoft 365 which is Microsoft's Software-as-a-service offering. Are you responsible for applying the software updates when it comes to Microsoft 365?

- Yes
- **No**

Q78. You are planning on using Microsoft 365 which is Microsoft's Software-as-a-service offering. Are you responsible for the data that you upload and store on the service?

- **Yes**
- No

Q79. You are planning on creating users in Microsoft Entra ID. Do you group the users into different resource groups after the users are created?

- Yes
- **No**

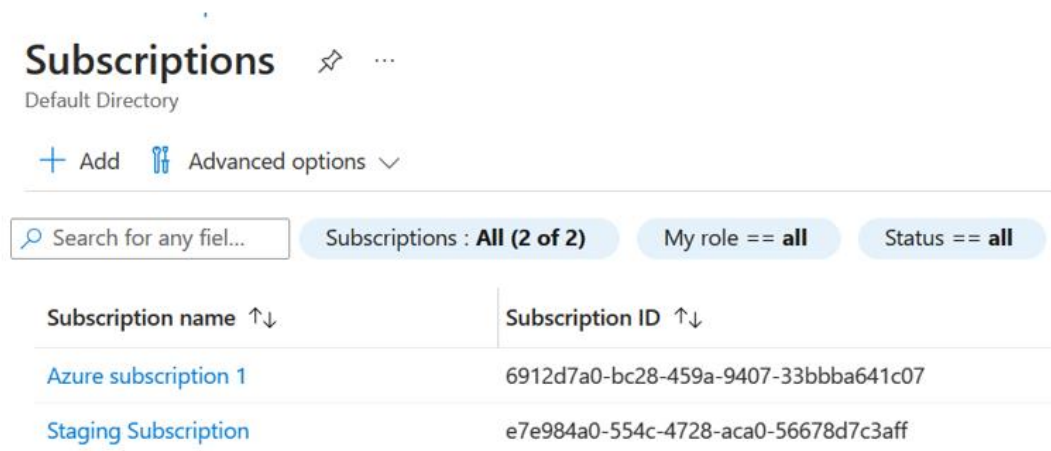

Q80. You are planning on creating several resource groups in Azure. Can you nest resource groups in Azure?

- Yes
- **No**

Q81. Is it possible to create alerts in the Azure Monitor service?

- **Yes**
- No

Q82. You currently have 2 subscriptions in Azure as shown below.

The screenshot shows the 'Subscriptions' page in the Azure portal. At the top, it says 'Subscriptions' with a 'Default Directory' dropdown. Below this are buttons for '+ Add' and 'Advanced options'. A search bar is present with the text 'Search for any fiel...'. There are three filter buttons: 'Subscriptions : All (2 of 2)', 'My role == all', and 'Status == all'. Below the filters is a table with two columns: 'Subscription name' and 'Subscription ID'. The table contains two rows: 'Azure subscription 1' with ID '6912d7a0-bc28-459a-9407-33bbba641c07' and 'Staging Subscription' with ID 'e7e984a0-554c-4728-aca0-56678d7c3aff'.

Subscription name ↑↓	Subscription ID ↑↓
Azure subscription 1	6912d7a0-bc28-459a-9407-33bbba641c07
Staging Subscription	e7e984a0-554c-4728-aca0-56678d7c3aff

Can you use Azure Monitor to monitor the resources across both subscriptions?

- **Yes**
- No

Q83. You are planning on using role-based access control for the users defined in your tenant. Which of the following Azure role grants full access to manage all resources along with giving the ability to assign roles?

- **Owner**
- Contributor
- Reader
- User Access Administrator

Q84. You currently want to provision an Azure resource via the use of an Apple iPad. Can you use PowerShell within Azure Cloud shell to provision the resource?

- **Yes**
- No

Q85. You currently want to provision an Azure resource via the use of an Apple iPad. Can you use PowerShell within Azure Cloud shell to provision the resource?

- Yes
- **No**

Q86. Your company is planning on migrating several machines from their on-premises environment onto Azure as virtual machines. Which of the following would no longer be the responsibility of the company when it comes to the virtual machines?

- **Physical security of the data centre.**
- Backup of the data stored on the machine.
- Patching the operating system of the virtual machine.
- Filtering traffic reaching the virtual machine.

Q87. In order to use the Microsoft Entra ID as part of your account, you need to provision Azure virtual machines to host the service?

- Yes
- **No**

Q88. You have just setup an Azure Storage account. You want to copy data from your on-premises data center onto the Azure Storage account. Would you pay an additional cost when it comes to the data transfer in terms of bandwidth pricing?

- Yes
- **No**

Q89. Can you use Microsoft Entra ID to log into other Software-as-a-service applications using single-sign-on?

- **Yes**
- No

Q90. Your company is planning on deploying a web application onto the Azure Web App service. They want to monitor the performance of the application in real time. Which of the following can be used for this requirement?

- **Application Insights**
- Azure Advisor
- Microsoft Entra ID
- Microsoft Defender for Cloud

Q91. Which of the following provides information when it comes to the security and compliance offerings that Microsoft incorporates across its cloud products?

- Microsoft Defender for Cloud
- Azure Advisor
- Azure Monitor
- **Microsoft Trust Center**

Q92. Your company is planning on using Microsoft Azure. The company wants to segregate the resources used by each department in the company. Which of the following can be used to segregate the resources? Choose 2 possible answers from the options given below.

- **Resource groups**
- Resource tags
- Availability Zones
- Regions

Q93. A company is planning on a hybrid model for its cloud implementation. Does this give the company an added advantage on deciding where they can deploy their applications?

- **Yes**
- No

Q94. Which of the following is part of the Azure Monitor service?

- Azure Advisor
- **Log Analytics**
- Microsoft Entra ID
- Microsoft Defender for Cloud

Q95. Your company is making use of several Android devices. Can they join these devices to Microsoft Entra ID?

- Yes
- **No**

Q96. Your company is making use of several Android devices. Can they register these devices to Microsoft Entra ID?

- **Yes**
- No

Q97. Is it possible to access the Azure Portal from a macOS device?

- **Yes**
- No

Q98. How many copies of your data are made with an Azure Storage account configured with Locally-redundant storage?

- 1
- **3**
- 6
- 9

Q99. How many copies of your data are made with an Azure Storage account configured with Geo-redundant storage?

- 1
- 3
- **6**
- 9

Q100. Is it possible for a Network Security Group to have multiple Inbound rules?

- **Yes**
- No

Q101. Is it possible for a Network Security Group to have multiple Outbound rules?

- **Yes**
- No
